### RECORD OF COMMUNICATION

Mr. Warlick, Thank you very much for taking my call today and for attending last Thursday's meeting in Silverton regarding EPA's data from last fall's sampling effort. I hope the meeting was informative and if you have any questions, please feel free to email or call me.

I would like to confirm via this email message that I spoke with you today at approximately 4:10 pm (Mtn) regarding EPA tasking our Superfund Technical Assessment and Response Team (START) contractor and a subcontractor to conduct delineation and verification of wetland vegetation that supports EPA's Hazard Ranking System (HRS) work documentation. START was able to mobilize to Silverton this week and has identified the Anglo Saxon Placer as an area they need to access to document the presence of wetlands.

This email is also documenting my request, and your verbal approval for EPA contractors' access to the Anglo Saxon Placer so they may conduct wetlands study in support of EPA's HRS work. Their work will not be intrusive.

Once the study's report is finalized, EPA will be able to share the report with you, other identified landowners, and stakeholders with the Animas River Stakeholders Group.

If you have any questions or concerns, please email me or call me at your convenience.

Sincerely,

Sabrina Forrest  
Site Assessment Manager
